Subject: Microsoft Settlement

Honorable Judge Kollar-Kotelly,

To be quite brief, I urge you to reject the U.S. Justice Department's agreement with the Microsoft Corporation. As a computer-dependent student and webmaster, I experience firsthand the MS software and OS monopoly firsthand, and find it distinctly unAmerican. The inability of other operating systems and software providers to be competitive in the American market effectively outsources innovation overseas, which will catch up with the U.S. software industry in a few years if Microsoft is not stopped.

Thank you for entertaining input from citizens, as one such citizen I greatly appreciate this service.

Sincerely,

Salim Furth
